# BANG UNIVERSE

INTERIORS - SPACES - OBJECTS

## BANG PAPER COLLECTION

Paper and wood, nothing else. Climate-smart and super easy to assembly.

Design for us is energy, both giving and receiving. Bang Universe is constantly looking for new worlds, and we challenge ourselves by trying out new colours and concepts, regardless of it being a spatial environment or a product. The starting point of a Bang Universe project is: keeping up with current trends, attentiveness and meticulous consideration to detail.

Bang Paper Collection is a series of furniture and objects made entirely out of wood and paper. The basis of the collection is a cylinder made out of 100% recycled paper. Usually this form of cylinder is made to mold plinths and pillars, but here these cardboardpipes are legs for tables, benches and pedestals. The cardboardpipe is mounted on a turned foot of wood. The leg is then fitted in a round cut-out under the table. No screws necessary. Easy to assemble and climate-smart.

The furniture can be made to have an entirely natural look of wood and paper, but there are also some carefully chosen colour combinations. The colours do either follow the direction of the paper on the cylinder and creates a striped pattern on the legs, or comes in a monochrome look. The wooden foot and tabletop are laquered in a matching colour.

Download the presskit at [www.banguniverse.se](http://www.banguniverse.se) to see more pictures and the yellow monochrome/natural wood combination.
